## **Cook-N-Dine conquers Australia & Canada**

*(Miami, Florida, May 10, 2005/CND)* -**Cook-N-Dine**, the sleek stainless steel cooking furniture, also known as the **unique fusion of furniture and appliance**, is now available in Australia and New Zealand.

Cook-N-Dine Australasia Ltd. Pty, a division of ADC (Australian Door Company) located in Acacia/ Queensland, is the appointed exclusive importer of the patented Cook-N-Dine product line from Germany.

"Our main aim is to concentrate on dealers and re-sellers first. We have great expectations especially for Western Australia due to the high-rise apartment regulations there." says Peter Cherry, CEO of ADC.

Earlier, Fabmark Inc. of Montreal/ Quebec, announced that they are aiming to establish at least 5-10 dealerships per province in Canada by the end of 2005.

Technically speaking, **Cook-N-Dine is the griddle taken to the next level**. While the cooking surface of the 304-stainless tables and cooktops heats up to 430°F, the center forms a shallow concave pit. Complete meals can be created right there, without using pots or pans.

When switched off, the surface retracts to be completely flat again. Cook-N-Dine puts the fun back into cooking and entertaining with family or friends, **cook or host included**. And the kitchen stays clean.
